Member Pricing at Jyzen

This pricing guide presents two pricing categories: Member and Visitor. Jyzen visitor pricing is set at competitive rates for the respective services. Exclusive pricing is offered to members to support consistency in their lifestyle routines and accelerate achieving their goals. There are two ways to access member pricing at Jyzen:

- 1 Choose a Membership Level** - Receive member pricing on ALL products and services (**90-Day Commitment**). Jyzen Membership consists of a monthly autopay deposit to your Jyzen wellness account. More details on Page 2.

OR

- 2 Purchase a Package** - Receive member pricing on a SINGLE service of your choice by committing to a package. Packages are available in varying quantities depending on the service. (**90-Day Expiration**).

A Jyzen membership is an investment in your health and performance. Whether you are recovering from illness, striving for a new PR in your next race, or looking to optimize and improve brain function, the team at Jyzen believes that everyone has the right to a life of wellness as they define it.

Our goal is to support our clients in achieving their unique vision of wellness. We offer our members the best possible pricing and allow you the freedom to decide which services best fit your goals.

Our membership tiers are designed to be a monthly minimum, unlocking member pricing across the full range of services. Membership allows you to get more for your money and gives you the flexibility to adjust your focus week to week.

JYZEN

2024 PRICING GUIDE

Membership Benefits:

The autopay represents your monthly commitment to investing in your health and longevity. Your monthly deposit may be redeemed across our array of practitioners, health technologies, supplements, retail, and medical services* at our member rates. Members always receive our best pricing options on everything we have to offer.

	Monthly Commitment	Member Sharing	SAVE 20%	SAVE 10%
ENGAGE	\$450	-	Vasper Cryotherapy Red Light Therapy	Integrative Medical* BioMetrics IVs & Peptides
OPTIMIZE	\$900	+1	HOCATT Active Altitude Training Resting Altitude Therapy	Bodywork NeuroFit Energy Medicine
AMPLIFY	\$2,000	+3		Supplements & Retail

*Some medical procedures may not be paid for using membership credit

Additional Details:

1. Monthly fees do not roll over, but most of our members exceed their base commitment and enjoy membership pricing for any additional services they use. Why? Because your membership dollars can be used throughout the Jyzen ecosystem.
2. Sharing is a popular feature of our OPTIMIZE (+1) and AMPLIFY (+3) memberships. This flexibility allows you to provide for a significant other, friend, or family member and share your account balance and all your pricing discounts.
3. The Jyzen membership agreement cannot be canceled or paused during the first 90-days. After this initial period, members may pause membership for up to 3 months per year for a \$75 monthly fee. Initiation fees are waived for first time members.

Biometric Assessments

	Member	Visitor
Full Metabolic Assessment Active and resting metabolic assessments will measure your caloric expenditure, fat and carbohydrate utilization, VO2 Max, heart rate zones, heart rate variability, blood pressure, SpO2, and body composition analysis (InBody, skin calipers, circumference measurements).	\$247	\$275
Resting Metabolic Assessment Resting metabolic assessments allow you to accurately understand your caloric expenditure, fat and carbohydrate utilization while at rest or sleeping.	\$149	\$165
Run DNA Gait Analysis & Programming Based on a proprietary technology, RunDNA allows us to identify each runner's unique injury profile and then design a program to help you avoid setbacks and maximize results. This session includes a run readiness assessment and load assignments for specific and individual program design. As a part of the assessment, we use a 3D motion sensor lab called Runeasi AI technology which offers science-validated metrics to reflect a runner's mobility, stability, strength and power. Runeasi captures overload, asymmetry and poor movement control which can cause runners setbacks, injuries and pain.	\$355	\$395
Full Body Composition Analysis Three-part body composition assessment including: InBody bioelectrical impedance, skin fold caliper, and circumference measurements.	\$67	\$75
InBody Composition Analysis Medical grade bioelectrical impedance scan.	\$0	\$49
Kinotek Mobility Assessment Capture objective measurements of range of motion and access personalized 3D body scan movement visualizations.	\$44	\$49

Adaptive Performance

	Member	Visitor
Vasper Vasper is a revolutionary health and fitness technology that combines compression, cooling and interval training to help the body restore, rebuild, and achieve peak vitality. A 20-minute Vasper session stimulates hormone production that mimics the results of an intense 2-hour workout.	\$60	\$75
Vasper with Oxygen	\$80	\$100
Active Altitude Training LiveO2 Adaptive Contrast technology enables switching between oxygen rich and oxygen reduced air environments. Alternating between environments during a workout, amplifies the effects of exercise and enables the body to rapidly adapt and perform at a higher capacity. LiveO2 is equally suited to those looking to regain fitness as it for exercise enthusiasts.	\$60	\$75

Regenerative Health Technology

Red Light Therapy Red light Therapy, also known as photobiomodulation, targets the mitochondria within the cells to eliminate oxidative stress particles. This empowers many of the body's systems to operate in an energized state.	\$60	\$75
Cryotherapy Quick and frigid, our chambers provide brief exposure of the entire body to extremely cold air creating a thermal shock effect known for improving energy, sleep, recovery, and skin quality.	\$60	\$75
HOCATT Ozone Sauna This unique therapy combines 10 technologies in a choreographed sequence to provide integrated support for maximum health and wellness. A session gently but powerfully detoxifies and restores the body at the cellular level.	\$140	\$175
Resting Altitude Therapy Resting Altitude Therapy, also known as intermittent hypoxic training, allows you to experience the benefits of training at altitude from the comfort of our zero gravity reclining chairs. This therapy allows you to improve energy efficiency, performance, and recovery to help you live a more vibrant life.	\$60	\$75

2024 PRICING GUIDE

NeuroFit

qEEG Brain Map & Consultation

Every NeuroFit program begins with a qEEG Brain Map. It is not a diagnostic tool; it is a tool that measures the electrical activity of your brain (or "brainwaves") and displays the statistics in the form of topographical maps. This allows us to identify which brain regions and frequency bands need improvement and it then becomes the guide for building your custom training protocols and tracking the results of your training.

Brain Training

Brain training is a simple process of training the rhythmic pulses of your brain's electrical activity (brainwaves) to increase the power and flexibility of your brain to function more efficiently. Just like you train certain muscles in your body for physical fitness, you can train specific brainwave frequencies for mental/emotional fitness. NeuroFit training protocols are based on your brain's electrical output. This process is profound in its simplicity and ability to get you the results you deserve. Our neurological, physical, mental and emotional systems are interconnected. If any one of these systems is out of tune, it will affect how well or how poorly we function in daily life. Brain Training sessions may include a variety of technologies including Neuroguide, NeuroField, Vielight, Vasper+Oxygen and more to customize your protocol for maximum results.

	Member	Visitor

Energy Medicine

BioResonance Tuning

BioResonance clients will experience a combination of modalities including electro medicine, scalar fields, corrective sound waves, and light therapy. The first session will focus on Biofeedback, including detection and correction of vibrational resonance in the body. This helps determine what type of sessions a client may need moving forward and allow for a targeted BioResonance Tuning progression.

	Member	Visitor
30min Consult	\$90	\$100

Bodywork Technology Add-Ons

Member Visitor

Winback TECAR

A high-frequency, non-invasive energy which stimulates your body's natural cellular ability to repair itself. Winback TECAR reduces pain and inflammation, restores movement and increases blood flow using deep tissue thermotherapy.

\$54 \$60

PBMT Photobiomodulation Therapy

Photobiomodulation Therapy (PBMT) uses low level lasers or LEDs to improve tissue repair, reduce pain and inflammation wherever the beam is applied. Benefits include reduced pain levels for acute or chronic conditions, improvements in quality of sleep, recovery time post-workout, and increased energy levels throughout the day.

\$54 \$60

Radial Shockwave

Radial Shockwave (known as Extracorporeal Shockwave Therapy-ESWT) is an evidence based and highly effective treatment option for reducing pain caused by soft tissue, bone and joint injuries. It is very effective at treating sports and overuse injuries.

\$54 \$60

Focal Shockwave

NanoVi™'s patented technology produces the same biological signal your body makes to repair cell damage brought on by free radicals (also known as reactive oxygen species or ROS). The signal from the NanoVi™ device supplements the your body's natural response to stress.

\$135 \$150

2024 PRICING GUIDE

Beth McDougall, MD

With a practice that spans 2 decades, Dr. Beth is known as an early pioneer in Integrative Medicine and has been influential in integrating Complementary Alternative Medicine into Western Medical Academia. Long known as a medical detective, she excels at unraveling complex, multifactorial conditions, and specializes in helping patients with chronic illness and neurodegenerative diseases. Dr. Beth attended medical school at the University of Minnesota and went on to complete her residency in Internal Medicine there as well. She has a masters certificate from the Academy of Intuition Medicine® and has studied with the founder of Innovative Medicine LLC, Thomas Szulc, MD. Upon completion of her western medical training, Dr. Beth entered into private practice in San Francisco with the oldest Integrative Medicine practice in the country. In 2002 she founded CLEAR Center of Health, where she built a successful practice. Dr. Beth is also the Chief Medical Officer of Resonance Technologies Group health portfolio, a group of companies with energetic diagnostic and healing technologies based in resonance physics. She sits on the advisory board for The Academy of Intuition Medicine, Energy Medicine University and the scientific advisory board for the Resonance Science Foundation.

ACMOS

Analysis of the Compatibility of Matter on the Organism and its Synergy, also known as ACMOS, is an energy-balancing treatment. This method combines the wisdom of ancient traditional medicine with the scientific discoveries of modern biology to balance a patient's energetic fields and reestablish proper energetic signaling within the body.

\$450

\$500

VSEL

Very Small Embryonic Like Stem Cells are found naturally in the bloodstream in a dormant state. A VSEL treatment harvests these stem cells from blood and activates them with a special optics laser. The naturally pluripotent stem cells of embryonic age are then guided to sites in need of healing. VSEL therapy allows cells in the body to renew themselves and differentiate into various types of specialized cells. This treatment is known to have amazing healing capacity, making it incredibly useful regenerative medicine. VSEL treatments are beneficial for those who suffer from brain trauma, multi-infarct dementia, heart failure, orthopedic injuries, and osteoarthritis. Treatment frequency will be determined by your doctor.

Platelet Rich Plasma (PRP)

Platelets are naturally occurring cells that play a role in blood clotting and healing. Platelets host compounds that calm inflammation and promote healing as well as growth factors and immune-modulating cytokines. PRP therapy is a regenerative treatment that initiates the repair process and attracts stem cells to an area of injury, thus playing a pivotal role in wound healing and inflamed joints, tendons, ligaments, and muscles.

IV Lounge & Laboratory

Whether you are in need of medical treatment or are looking to support your health and wellness at a higher level, we have compiled an unparalleled collection of injections and IV infusions to meet your needs. From chronic disease protocols to address autoimmune disorders to lifestyle support, our IV therapies are tailored specifically to our individual patients' needs.

Preliminary Lab Work and or Medical Visits are required for some treatment categories:

Preliminary Lab Work Required - Preliminary blood work is required at least 7 days prior to treatment appointment. This includes a Comprehensive Metabolic Panel, a Complete Blood Cell Count, and a G6PD test. Lab work completed by an outside facility up to 6 weeks prior to treatment is acceptable. Should your results pose any issues you will be contacted prior to the date of treatment.

Medical Visit Required - Established care with a medical provider is necessary for treatments. Appointments for these services require a signed doctor's order.

EBO2

Preliminary Lab Work Required

Extracorporeal Blood Oxygenation and Ozonation (EBO2) is a cutting-edge technology that has shown promising results in reducing inflammation, improving oxygen utilization, and helping to remove toxins and impurities from the bloodstream by purifying up to four to six liters of blood in a single session. The filtration in this device eliminates toxic blood waste products such as heavy metals, petroleum byproducts, cellular waste, inorganic substances, and excess inactive proteins, which can lead to autoimmune-related disorders. These waste products are not sent back into the body as they would be in other ozone methods. This treatment works like a dialysis system with the added benefit of ozonation and UV phototherapy. The number of treatments will be determined by your doctor based upon your condition and response to treatments; a typical course includes once a week for 3 weeks followed by maintenance sessions or additional cycles every 3-4 months. The expected protocol will be discussed with you prior to your treatment.
